

PRODUCT BROCHURE / AGRICULTURAL AVIATION

6-Axis 30L Agricultural Spraying Drone

Industrial-grade aerial application platform engineered for Indonesia's palm oil plantations, paddy fields, and large-scale agribusiness operations.

A Workhorse Built for Industrial Agriculture

The APEX 6-Axis 30L Agricultural Spraying Drone is a purpose-built platform that combines a heavy-payload hexa-rotor airframe with intelligent spraying control. Engineered to operate in demanding tropical conditions, it delivers reliable productivity for plantation operators, cooperatives, and government agricultural programs across Indonesia.

MODEL · APEX AG-30L / 6-AXIS

6-Axis 30L Heavy-Payload Sprayer

Hexa-rotor configuration with 30-liter tank capacity, dual-redundant flight controller, and modular nozzle assembly. Ready for OEM / ODM customization to your branding and tender specifications.

12 | Hectares per Hour

High-efficiency work output dramatically reduces field crew dependency and shortens treatment cycles for time-sensitive spraying windows.

30L | Heavy-Payload Tank

Industrial-grade chemical tank reduces refill frequency, ideal for the long-row geometry of palm oil and large-block rice cultivation.

6× | Multi-Rotor Redundancy

Six-axis lift architecture maintains stable flight even under partial-motor faults — a critical safety asset in commercial operations.

Technical Specifications

Configuration	6-Axis Hexa-rotor	Spraying Height	2 – 4 m (Adjustable)
Tank Capacity	30 L	Spraying Speed	2 – 10 m/s
Unfolding Dimension	2,175 × 1,785 × 880 mm	Work Efficiency	12 ha / hour
Folding Dimension	1,050 × 880 × 880 mm	Full-Load Flight	10 minutes
Empty Load Weight	33.55 kg (incl. battery)	Empty-Load Flight	25 minutes
Battery	TATTU 14S / 30,000 mAh	Operating Range	1.0 – 1.5 km (RC Range)
Charging Time	30 min (U6Q Smart Balance)	Exportability	Approved · OEM / ODM

Specifications cited from **Annex A — APEX Contracted** (Rev. 1.1). Component-level details (flight controller, propulsion system, spray mechanism) available in the full Technical Annex on request.

Engineered for Indonesia's Fields

From the palm oil estates of Sumatra and Kalimantan to the rice corridors of Java and Sulawesi, the APEX 6-Axis 30L platform is configured for the realities of Indonesian agriculture — heat, humidity, dust, and high-throughput operating cycles.

Plantation-Scale Productivity

A single APEX 6-Axis 30L drone replaces the throughput of dozens of manual sprayers — reducing labor cost, chemical exposure to workers, and treatment cycle time across thousands of hectares.

PALM OIL ESTATES

RICE PADDIES

SUGARCANE

CORN & SOY

FOREST PEST CONTROL

01 / INTELLIGENT FLIGHT

Auto-Route & Terrain Follow

RTK-ready positioning, pre-mapped flight routes, and adaptive terrain following ensure even chemical distribution across uneven plantation terrain.

02 / INDUSTRIAL DURABILITY

Tropical-Grade Build

Sealed-grade motors, corrosion-resistant frame, and dust-protected electronics designed for year-round operation in Indonesia's climate.

03 / OPERATOR-FRIENDLY

Fast Training Curve

Local Bahasa-language pilot training program; field operators reach proficiency within a 3 – 5 day intensive course delivered through APEX partners.

04 / TOTAL COST OF OWNERSHIP

Spare Parts Stock in Tangerang

Critical spares — props, ESCs, pumps, nozzles, batteries — held in APEX warehouse to support rapid turnaround and minimize fleet downtime.

Why APEX

OEM / ODM Capable

Custom branding, colorways, payload modules, and software tuning available for large-volume tender awards and distributor programs.

Local Indonesia Support

APEX is registered in Indonesia (Tangerang) — providing direct B2G procurement, local invoicing, after-sales service, and training delivery.

Bulk-Tender Ready

Proven capacity to deliver 100 – 1,000+ unit orders with full compliance documentation, technical annexes, and quality control protocols.

APEX

Intelligent Scenario Solution Provider

Procurement · OEM / ODM · B2G Tender Support · After-Sales Service
Let's discuss how the APEX 6-Axis 30L platform can serve your fleet program.

Contact

COMPANY	PT. APEX TELCOM INKO Indonesian Trading & Procurement Entity
PRESIDENT & CEO	KIM GUN-HWI Direct business inquiries welcome
ADDRESS	The Prominence Office Tower, 10th Floor, Unit H Jl. Jalur Sutera Barat, Panunggangan Tim. Kec. Pinang, Kota Tangerang, Banten 15143 Republic of Indonesia
PHONE	+82 010 8820 8131 (Korea) +62 081 1850 8131 (Indonesia)
EMAIL	nexcoapextelcom@gmail.com

Engagement Process

STEP 01	Inquiry & Scoping Share volume, target deployment region, and timeline.
STEP 02	Technical Annex APEX issues a tailored compliance matrix and quotation.
STEP 03	Pilot & Roll-Out Demonstration units, training, and phased delivery.

Request a Quotation

Send your tender specification or volume requirement to APEX — we typically respond within two business days with a structured offer including unit price, lead time, and after-sales scope.
