

PUBLIC SUMMARY | PRIMARY ALUMINIUM INGOT

Indonesian Primary Aluminium Ingot

Unalloyed ingot (JIS H2102) from the PT INALUM Kuala Tanjung smelter: grades and specifications, delivery and payment terms, deal process

Reference

APEX-AL-PUB-2026-0929-EN

Date of issue

29 September 2026

Nature

Public summary · non-binding

SUMMARY

- The product is primary unalloyed aluminium ingot produced by the Indonesian state-owned smelter PT Indonesia Asahan Aluminium (INALUM) at Kuala Tanjung, North Sumatra.
- Four grades are available: S1-A (99.92%), S1-B (99.90%), S2 (99.85%) and G1 (99.70%). Nominal weight is 22.7 kg per ingot.
- Delivery is FOB INALUM Port, Kuala Tanjung (Incoterms 2020). CIF to Korean ports is quoted on request.
- Pricing is based on the LME Aluminium Cash Settlement; grade terms are agreed after the producer's allocation is confirmed.
- Quantity is fixed by the producer's export allocation. We quote and contract only for allocated volumes.

1 Product and specification

Item	Detail
Product	Primary Aluminium Ingot, unalloyed
Producer	PT INALUM (Persero), Kuala Tanjung, Sumatera Utara. Founded 1976; Indonesia's only primary aluminium smelter
HS code	7601 (unwrought aluminium)
Standard	JIS H2102 (chemical analysis to JIS H1305, optical emission spectrometry)
Unit weight	22.7 kg per ingot (producer's nominal weight). Settlement on mill-sheet net weight
Main uses	Remelting for automotive parts, building materials, extrusion and rolling stock
Certificate	Mill sheet per shipped lot. Third-party inspection agreed in the contract if the buyer requires it

2 Chemical composition by grade (% , maximum)

Grade	Si	Fe	Cu	Ti, Mn each	Total	Al (min.)
S1-A	0.04	0.04	0.01	0.01	0.08	99.92
S1-B	0.04	0.06	0.01	0.01	0.10	99.90
S2	0.08	0.12	0.01	0.01	0.15	99.85
G1	0.15	0.20	0.01	0.20	0.30	99.70

Maximum limits from the producer's published specification. Quotations are given per grade only; we do not give a single price without a specified grade.

3 Delivery and payment

Item	Detail
Delivery	FOB INALUM Port, Kuala Tanjung, North Sumatra (Incoterms 2020). CIF Busan, Ulsan, Incheon or Pyeongtaek quoted at the firm quotation stage once freight is confirmed
Price basis	USD per metric ton, LME Aluminium Cash Settlement, average of the quotational period (QP), plus grade terms to be agreed
Payment	Irrevocable L/C at sight. L/C wording agreed by both parties before opening
Documents	Commercial invoice, packing list, mill sheet, bill of lading, certificate of origin if required, export declaration copy
Minimum lot	10 tonnes (producer's minimum). Contract quantities in multiples of 10 tonnes
Payee rule	We never use payment to a personal account.

4 Export status

HS 7601 is not on the Indonesian Ministry of Trade export ban list, and the raw ore export ban (bauxite, HS 2606) does not apply to smelted ingot. The practical constraint is export allocation under the producer's domestic-first supply policy. We recheck the status of HS 7601 on INATRADE before shipment.

5 Deal process

Six stages, each starting only after the previous one is complete. No price terms, contract quantity or firm shipment date are given before Stage 02 allocation is confirmed, so the buyer carries no contract risk on unallocated volumes.

STAGE 01 Reply Grade, quantity, delivery, payment, end use	STAGE 02 Allocation Producer's export allocation confirmed	STAGE 03 Firm quote Grade terms and QP agreed; firm quotation	STAGE 04 Contract, L/C SPA signed, L/C opened	STAGE 05 Shipment INATRADE recheck; FOB loading and notice	STAGE 06 Documents Documents presented; net-weight settlement
--	--	---	---	--	---

Stage 02 (highlighted) is the allocation check PT. APEX TELCOM INKO carries out directly with the producer.

How to enquire

Send the points below by email and we will reply after review. The full proposal, with price terms, validity and copies of samples and documents, is sent after a mutual non-disclosure agreement (NDA).

No	Please tell us
1	Grade: one of S1-A, S1-B, S2 or G1
2	Quantity and shipment month: contract quantity in 10-tonne units, preferred month, monthly or quarterly need
3	Delivery: FOB Kuala Tanjung, or CIF with the Korean port of discharge
4	Payment: whether an L/C at sight is acceptable, or the alternative you prefer
5	End use and analysis: remelting, extrusion, casting etc., and any analysis beyond the mill sheet
